

F.LLI BERNABE' S.N.C.

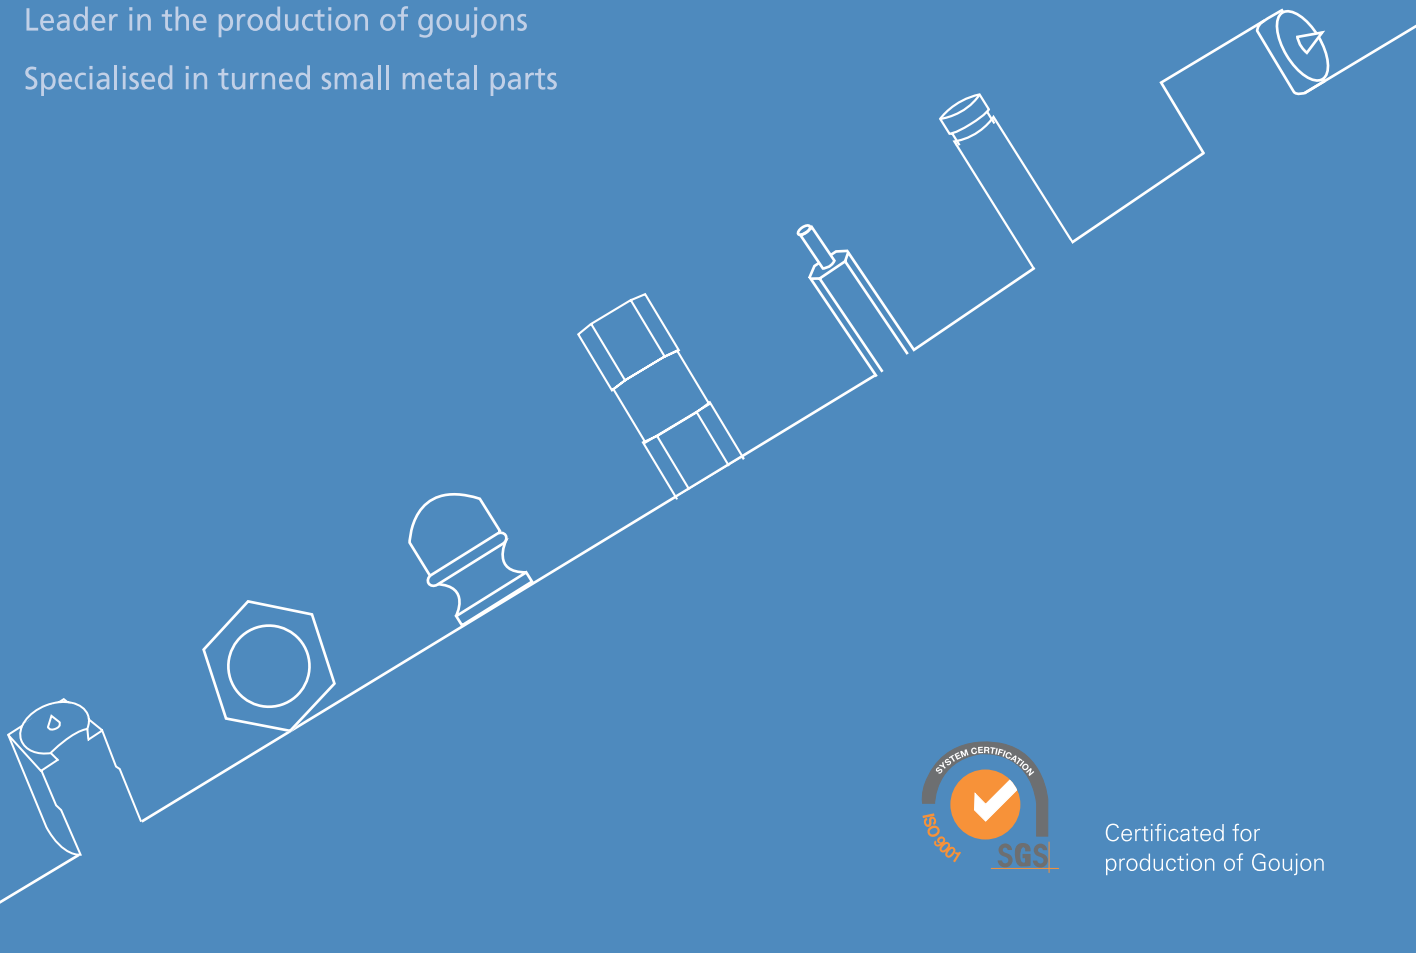

di Bernabè Marco, Monica e Daniela

The importance of detail since 1964

Leader in the production of goujons

Specialised in turned small metal parts

Certificated for
production of Goujon

COMPANY

The company is born in 1964 out of the working experience matured in Switzerland of its founders, Mario and Giuseppe Bernabè. As a result of the years abroad and the enterprising spirit of the partners, its founders take the machinery and experience to Italy, in San Giovanni in Marignano, the company's seat until the year 2004. It is in this year that the company moves to a new, bigger and more modern building in Cattolica.

In almost 50 years of activity now, the company has been growing technologically and it is today a qualified partner its customers can rely on, meeting at no time, the needs of an ever demanding and competitive market.

TEAM

The growth and the success we have achieved are the result of experience, competence, technology and definitely, our team, who work passionately and with professionalism every day to ensure our customers an excellent quality product!

F.LLI BERNABÈ' S.N.C.

THE TURNERY

The company manufactures precision turned small parts upon customer design and up to 35 mm diameter

profiled:

Round
Hexagonal
Square
Tube-shaped

in the following materials:

Brass
Iron
Stainless steel 303
Aluminium 11/S
PR80
Derlin

We manufacture more than 3,000 different products and our customers demand new designs every day.

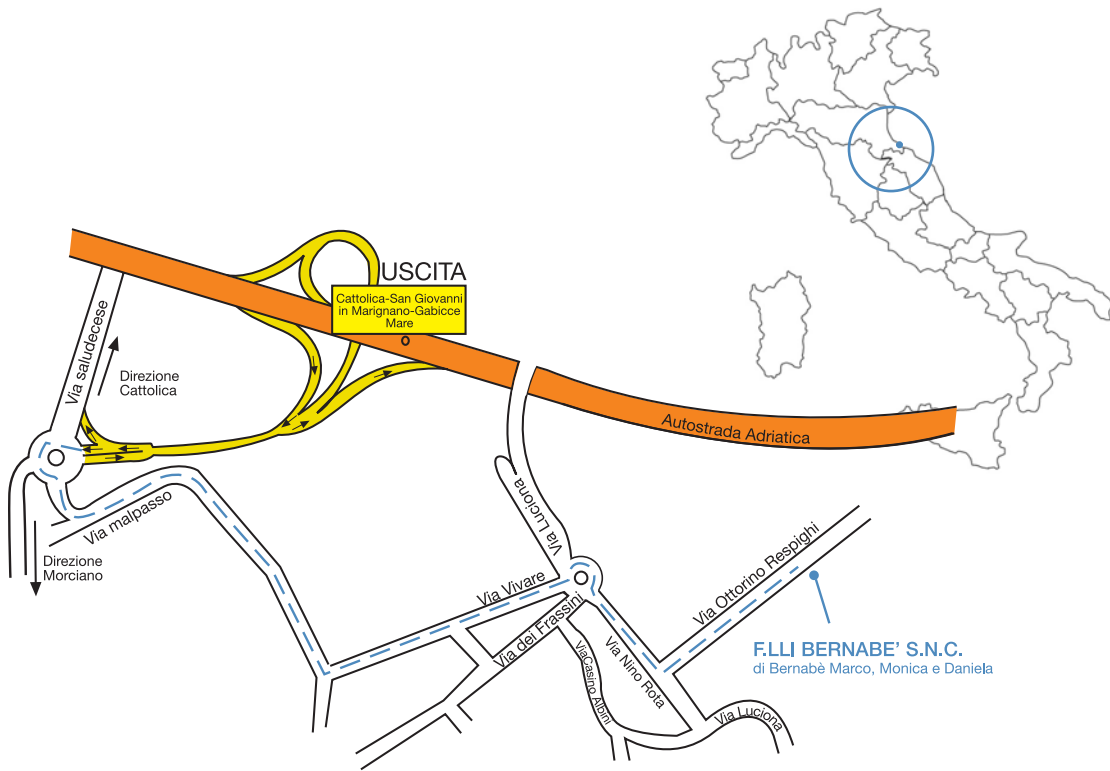

Upon request, we provide zinc coating and nickel-plating of products.

THE GOUJONS

The company is world leader in the production of goujons: pieces made of aluminium alloy obtained from a square profile bar with sharp or rounded-edged ends, smooth or threaded hole and made with or without relief and in different lengths. Every goujon is made with a milled weld washer with variable inclination, based upon customer request. This piece is ment for the household sector: it is welded to one side of the non-stick frying pan with no holes made, and fastened to the handle on the other side. This system renders a more solid and durable frying-pan. Daily production is over 300,000 goujons: a number that reflects the reliability of our product, certified by the Quality Management System – Standard ISO 9001:2008 and daily witnessed in the trust bestowed by our many customers, leading companies in the field both in Italy and overseas.
